Note: New Ideas and Classes Are Welcomed.

HINTS: Try for uniformity of shape, size, colour, ripeness, cleanliness.

## **JUDGING STANDARDS**

### **QUALITY**

#### **SHOWMANSHIP IS IMPORTANT JUDGING STANDARDS**

This is the most important thing about fruit, generally worth the highest points. Fruits should be properly prepared for show.

#### **UNIFORMITY**

Specimens should be as uniform as possible in quality, colour, maturity, shape and size.

#### **CONDITION**

Fruits should be reasonably free from blemishes, bruises and breaks. Fruits should not be past their prime. Fruits intended for long keeping must be firm and mature.

#### **COLOUR**

The colour should be bright, clear and attractive. Usually a dark or rich colour is preferred.

#### **FORM**

Should be the correct type for the variety and be attractive to the consumer.

#### **SIZE**

Size should be moderate, not large. Practically all oversized garden fruits are coarse, rough and of low quality. Those undersized are very often so because of poor culture and are often tough and of low quality.

**NOTE:** Apples and pears should be wiped and polished. Keep stems on. Try to name the variety.

**\*Classes in this department are eligible for "Premier Award. Please see General Rules and Regulations for details.**
